Online-Appointments for your practice

End-to-end encrypted appointment booking platform: open-reception.org

Full Control

OpenReception puts you and your practice at the center of the appointment booking experience. Your brand, your rules.

Configurable

Based on our research and interviews with dozens of medical practices we know, what's needed in your practice.

Private & Secure

End-to-end encrypted data that only patients and authorized staff can access. No AI training based on patient data.

Open-Source

Developed by Karl Ludwig Weise, Hendrik Belitz and the community. The prototype was built as part of the PrototypeFund year one.
